

Can an LLM solve
this problem?

```
graph TD; A[Can an LLM solve this problem?] --> B[Not a question of problem complexity]; A --> C["A question of familiarity<br/>does it map to something seen at training time?"]; C --> D["They will break their teeth on<br/>any sufficiently novel problem,<br/>no matter how simple"];
```

Not a question of
problem complexity

A question of familiarity

does it map to something
seen at training time?

They will break their teeth
on
any sufficiently **novel**
problem,
no matter how simple
