

Kaggle

practice on real problems;
tuning, ensembling, and
avoiding validation overfitting

arXiv

the field publishes in the open,
before peer review

The Keras ecosystem

keras.io guides and examples,
the source, KerasHub

Your next model

```
graph LR; Kaggle --> Model[Your next model]; arXiv --> Model; Keras[The Keras ecosystem] --> Model;
```

The diagram illustrates the flow of information and resources into the development of a new model. Three distinct sources on the left—Kaggle, arXiv, and The Keras ecosystem—each have a teal arrow pointing towards a central box on the right labeled 'Your next model'. The arrow from Kaggle is a curved line, while the arrows from arXiv and The Keras ecosystem are straight lines.
