

How should word order
be represented?

```
graph TD; A[How should word order be represented?] --> B["Discard it  
text as an unordered set  
bag-of-words models"]; A --> C["Strictly sequential  
one word at a time  
recurrent models"]; A --> D["Hybrid  
order-agnostic, but with  
position injected  
the Transformer"];
```

Discard it

text as an unordered set
bag-of-words models

Strictly sequential

one word at a time
recurrent models

Hybrid

order-agnostic, but with
position injected
the Transformer
