

1. Encode

tokenize the prompt,
embed it

2. Denoise

pure noise to latents,
conditioned on the text

3. Decode and scale

$[-1, 1]$ back to $[0, 255]$

```
graph LR; A["1. Encode<br/>tokenize the prompt,<br/>embed it"] --> B["2. Denoise<br/>pure noise to latents,<br/>conditioned on the text"]; B --> C["3. Decode and scale<br/>[-1, 1] back to [0, 255]"]
```
