

The world **seems** to feature
never-ending novelty

```
graph TD; A["The world seems to feature  
never-ending novelty"] --> B["But everything in that sea of  
complexity is similar to  
everything else"]; B --> C["A relatively small number of  
atoms of meaning"]; C --> D["Everything around you is a  
recombination of them"]; D --> E["A few seeds,  
endless variation"];
```

But everything in that sea of
complexity is **similar to**
everything else

A relatively small number of
atoms of meaning

Everything around you is a
recombination of them

A few seeds,
endless variation
