

Target embeddings

```
graph TD; A[Target embeddings] --> B["Masked self-attention  
use_causal_mask=True"]; B --> C[Add and norm]; C --> D["Cross-attention  
query = target,  
key = value = encoder output"]; D --> E[Add and norm]; E --> F["Feedforward  
two Dense layers"]; F --> G[Add and norm]; G --> H[Next-token predictions];
```

Masked self-attention

use_causal_mask=True

Add and norm

Cross-attention

query = target,
key = value = encoder output

Add and norm

Feedforward

two Dense layers

Add and norm

Next-token predictions
