

words to the left
"sail", "wave"

words to the right
"mast"

Guess the
missing word

"boat"

slide the window
and repeat

```
graph LR; A["words to the left  
\"sail\", \"wave\""] --> C["Guess the  
missing word"]; B["words to the right  
\"mast\""] --> C; C --> D["\"boat\""]; D -.->|\"slide the window  
and repeat"| C;
```

The diagram illustrates a word guessing game loop. It features four light blue rectangular boxes with dark blue borders. On the left, two boxes are stacked vertically: the top one contains 'words to the left' and '"sail", "wave"', and the bottom one contains 'words to the right' and '"mast"'. Arrows from both of these boxes point towards a central box labeled 'Guess the missing word'. From this central box, a solid arrow points to a box on the right labeled '"boat"'. A dashed arrow points back from the '"boat"' box to the 'Guess the missing word' box, with the text 'slide the window and repeat' positioned between them.
