

The text manifold
smooth, all vectors of
roughly the same magnitude

```
graph TD; A["The text manifold<br/>smooth, all vectors of<br/>roughly the same magnitude"] --> B["Linear interpolation<br/>cuts through the inside<br/>of the sphere"]; A --> C["Spherical interpolation<br/>stays on the surface"]; B --> D["Off the manifold:<br/>embeddings lose meaning<br/>for the denoiser"]; C --> E["On the manifold:<br/>every intermediate point<br/>is a meaningful prompt"];
```

Linear interpolation

cuts through the inside
of the sphere

Off the manifold:
embeddings lose meaning
for the denoiser

Spherical interpolation

stays on the surface

On the manifold:
every intermediate point
is a meaningful prompt
