

Two inputs
noisy image 128×128
+ noise rate

Downsampling stage
 $128 \rightarrow 64 \rightarrow 32 \rightarrow 16$
widths 32, 64, 96

Middle stage
 16×16 , constant size
width 128

Upsampling stage
 $16 \rightarrow 32 \rightarrow 64 \rightarrow 128$
widths 96, 64, 32

Predicted noise mask
not a denoised image

concatenative skip
connections
preserve image detail
