

Broad and shallow

one hidden layer — one place where the representation changes

64

512

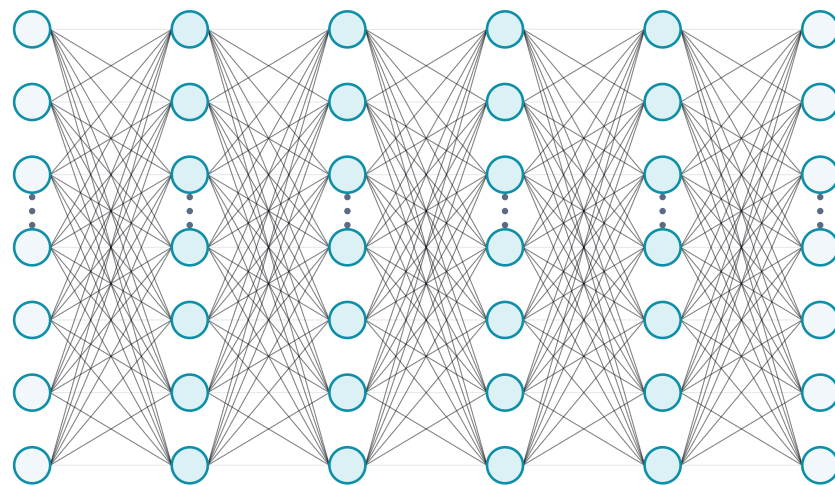

10

38 410 parameters

1 level of representation

Deep and narrow

4 hidden layers — a hierarchy, each built on the last

64

96

96

96

96

10

35 146 parameters

4 levels of representation

Roughly the same cost. The one on the right can build a representation on top of a representation, four times over.
